 Behind the general hospital Lahore

Highly skilled and motivated MERN Stack Developer with 2+ years of experience in both web and native application development. Proficient in leveraging the power of MongoDB, Express.js, React.js, Next.js, and Node.js to create robust and scalable applications. Adept at collaborating with cross-functional teams to deliver innovative solutions that meet both user needs and business objectives. Seeking to contribute my expertise in full-stack development to a dynamic team, where I can continue to grow and make meaningful contributions to cutting-edge projects.

Experience

Full Stack Developer (WebBugs)

mar 2023 - present

- Developed and maintained web applications using the MERN (MongoDB, Express.js, Next.js, React.js, Node.js) stack, ensuring high performance and responsiveness.
- Collaborated with designers and backend developers to implement user-friendly interfaces and seamless user experiences.
- Designed and implemented RESTful APIs to facilitate smooth communication between the front-end and back-end systems.
- Utilized version control systems such as Git for code management and collaboration within a team environment.
- Conducted code reviews and provided constructive feedback to peers, contributing to overall code quality and team growth.
- Actively participated in agile development processes, including sprint planning, daily stand-ups, and retrospectives, to deliver features on time and within scope.
- Resolved technical issues and bugs promptly, ensuring the stability and reliability of deployed applications.

Full Stack Developer (LoopNixom)

set 2022 - mar 2023

- Contributed to the development of full-stack web applications using technologies such as HTML, CSS, JavaScript, Node.js, and MongoDB.
- Collaborated with team members to design and implement features, ensuring alignment with project requirements and timelines.
- Participated in code reviews and provided feedback to enhance code quality and maintainability.
- Assisted in troubleshooting and resolving technical issues to ensure smooth application functionality.
- Engaged in continuous learning and skill development to stay updated with the latest technologies and best practices in full-stack development.

Objective

Detail-oriented and results-driven Full Stack Developer with a total of 2+ years of experience in WebBugs and LoopNixom, proficient in leveraging the MERN stack to develop scalable and efficient web applications. Seeking to further enhance my skills and contribute my expertise to a dynamic team where I can play a key role in creating innovative solutions that drive business growth and user satisfaction.

Projects

UnblokData

- Website: <https://unblokdata.com/>
- Description: UnblokData offers businesses unprecedented access to comprehensive customer data, directly sourced from their mobile phones. Our innovative approach provides precise insights including location, keyword usage, and online shopping habits, surpassing even industry giants like Facebook and Google. Access all this invaluable data for free through our groundbreaking NFT technology.

UnblokApp

- Website: <https://www.unblokapp.com/>
- Description: UNBLOK gives your business unparalleled access to customer data directly from their phone. You get more precise and comprehensive data than ever before, including location, keyword usage, and online shopping habits. We have data that's not available anywhere else. Not even Facebook or Google have this much insight – and you can access all this actionable data for FREE with our innovative new NFTs.

IQLand

- Website: <https://iqland.ai/>
- Description: IQLAND is Techstars portfolio company that's reshaping real estate with AI-driven insights for developers, investors, real estate agents, architects, and municipalities. Our platform harnesses a comprehensive parcel database, offering enhanced feasibility assessments, precise architectural plan matching, and accurate construction cost estimations.

Coastline CHS

- Website: <https://coastlinechs.com/>
- Description: Coastline CHS serves as the dashboard for Paint Ready, a service connecting users with on-demand painting professionals. Paint Ready simplifies the process of hiring painters by providing a platform for order management and contractor maintenance. It offers a seamless experience for both customers and paint workers, ensuring efficient and reliable service delivery.

FetchIt

- Website: <https://www.fetchit.ai/>
- Description: Find Airbnb investment properties faster with us. Let us handle the research while you save time and focus on what's important. No more tab overload—just more time for you. Say goodbye to confusion and hello to profits with our LIVE short term rental predictions for for-sale listings.

MyDateJar

- Website: <https://mydatejar.com/>
- Description: Developed the backend infrastructure for the MyDateJar mobile application using Node.js. Implemented user management, content management, and matchmaking algorithms to facilitate personalized date recommendations for users. MyDateJar is a dating mobile application.

UnblokApp Mobile Application

Description:

- Developed features like service discovery, booking management, and user notifications using React Native for the UnblokApp mobile application, ensuring a smooth user experience.
- Our innovative approach provides precise insights including location, keyword usage, and online shopping habits, surpassing even industry giants like Facebook and Google. Access all this invaluable data for free through our groundbreaking NFT technology
